

Bringing next generation systems modelling with IBM Rhapsody Systems Engineering

Moshe Cohen (MBSE, Senior Offering and Product Manager)

Keywords. SysML V2; MBSE; Rhapsody; IBM; systems engineering

Abstract.

We are excited to announce IBM Rhapsody Systems Engineering, a web based solution for Systems Engineering teams, allowing them to deliver smarter, more complex and more competitive solutions to their end users, while turning increasing design complexities into their competitive edge.

Biography

Moshe Cohen (MBSE, Senior Offering and Product Manager)

Originally, a hardware engineer, then transitioned to software, and now focus on systems engineering. A bit of Medical devices, but primarily around automotive and aerospace. Contributed to the VHDL timing semantics and its mapping to synthesis. Launched several products related to modeling, code generation, and early verification and validation. Currently managing a product to help systems engineering teams to drive success of their respective companies.
