**SYSTEMS ENGINEERING
GRADUATE CERTIFICATE**

Detroit Mercy's Systems Engineering (SE) Certificate Program prepares you to use the latest technologies in automotive, mobility and manufacturing industries. The program is the result of collaboration with our industry partners to offer you an opportunity to learn the unique skills that industry needs to develop the next generation of engineers, technologists and industry leaders.

Our courses were designed by competency teams whose explicit purpose is to create curriculum that is directly responsive to the current needs of industry and integrates best practices technology, strategies, methods and tools emerging from universities, corporations and national laboratories.

WHY DETROIT MERCY?

- INCOSE certified upon completion
- Offered online or in person
- Taught by industry experts
- Credits can be applied to our master's programs
- Adapted curriculum meets the needs of industry
- Flexible schedule can be completed in one year
